

EXTRA FLU

transparent polyester adhesive low viscosity and high penetration

Line

POLYESTER

Function

TRANSPARENT POLYESTER ADHESIVE, LOW VISCOSITY and HIGH PENETRATION, FOR MARBLE, STONE, GRANIT

Materials

MARBLE, STONE, GRANIT

How to use

For best results mix 2% to 3% of the catalyst (dibenzoyl peroxide) with the adhesive; the paste formula make easy to measure. A homogeneous mixing will facilitate uniform catalysis. The catalysis rate is effected by temperature and by the proportion/quantity of catalyst. An excess of hardener/catalyst will increase the hardening speed, but weakens the adhesive seal. The surfaces to be treated/glued must be clean and dry; porosity and light roughness of the surface favor the best adhesion

Packaging

500ml-1L.

Characteristics

FOR MORE INFORMATIONS ASKING TECHNICAL DATA SHEET

Important

A PRELIMINARY TEST IN A SMALL, HIDDEN, AREA IS RECOMMENDED BEFORE THE APPLICATION.
